Notes:

The ZTV is calculated to turbine hub height (turbines T1-4, 8: 125m hub height and T5-7, 9: 105m hub height) from a viewing height of 2m above ground level.

The terrain model assumes bare ground and is derived from OS Terrain 50 height data (obtained from Ordnance Survey in July 2019). Earth curvature and atmospheric refraction have been taken into account. The ZTV was calculated using ArcMap 10.8.1.
